

I have been an XM subscriber for half a year now, and now I can't live without it. I am a paying subscriber, and I believe that I have the ability to listen to what I want to, including traffic and weather. What does it matter if I get it from XM, or from AM radio. It's more convenient to get it from XM, so that's what I do. I respectfully ask you to reject the NAB's petition 04-160, so I can still listen to what I pay for.
